

Third Annual Conference on Translational Research

Fifty years after the Orinda Study: What have we learned about myopia and refractive development?

U. C. Berkeley, June 6–7, 2009

The conference will commemorate the 50th anniversary of the landmark Orinda Study—the first study leading to effective vision screening for children. The program will feature discussions on the etiology, prevention, and treatment of refractive error, as well as a poster session. This will be a must-attend event for the eye care professional.
